Paper 1 Theory

May/June 2019

1 hour 45 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

No calculators allowed.

READ THESE INSTRUCTIONS FIRST

Write your centre number, candidate number and name in the spaces at the top of this page. Write in dark blue or black pen.

You may use an HB pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

Any businesses described in this paper are entirely fictitious.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The maximum number of marks is 75.

This syllabus is regulated for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

1	Inpu	ut and output devices are often connected to a personal computer.	
	(a)	Identify three input devices that can be connected to a personal computer.	
		1	
		2	
		3	[3]
	(b)	Identify three output devices that can be connected to a personal computer.	
		1	
		3	[3]
2	A fir	nance company uses off-line storage to archive their accounts.	
	(a)	Explain what is meant by off-line storage.	
			[2]
	(b)	The computers in the finance company use both primary and secondary storage.	
		(i) Give one example of primary storage.	[1]
		(ii) Give two examples of secondary storage.	
		1

3 Vanessa writes a paragraph as an answer to an examination question about the central processing unit (CPU).

Use the list given to complete Vanessa's answer by inserting the correct **six** missing terms. Not all terms will be used.

- Components
- Data
- Decoded
- Executed
- Fetched
- Instructions
- RAM
- ROM
- Secondary storage

The CPU processes	and
An instruction is	. from
into the CPU where it is then

Calculate the total file size in megabytes (MB) for all Marley's images. Show all your working.	(b)	(i)	Marley also needs to store ten 8-bit colour images in a file for his project. Each image is 500 pixels wide and 300 pixels high.								
Show all your working.											
			Calculate the total file size in megabytes (MB) for all Marley's images.								
			Show all your working.								
			Show all your working.								
File size MB											

(ii)	Marley prints the images for his project using an inkjet printer.
	Describe how the inkjet printer prints an image.
	[4]
on the r Identify music fi	isic company does not want the radio stations to be able to open the music file until 09:00 release date. two security measures and describe how each measure can be used to make sure the file cannot be opened until the release date.

6 Priya creates a website to sell her old comic books and superhero figures.																
	(a)	She us	ses	HTML	to	create	her	website.	The	HTML	she	produces	has	both	structure	and

presentation.
Explain what is meant by HTML structure and presentation . Include an example of each.
Structure
Presentation

(b) Priya uses cookies in her website.

Five statements are given about cookies.

Tick (✓) to show if the statement is **True** or **False**.

Statement	True (√)	False (√)
Cookies can be used to store a customer's credit card details		
Cookies can be used to track the items a customer has viewed on a website		
Cookies will corrupt the data on a customer's computer		
Cookies are downloaded onto a customer's computer		
Cookies can be deleted from a customer's computer		

[4]

(c)	Priy	a stores her website on a webserver.	
	To t	ransmit the website data to the webserver she uses parallel duplex data transmission.	
	Des	cribe how data is transmitted using parallel duplex data transmission.	
			4
(d)	Priv	a has a URL for her website.	
()	-	te what is meant by a URL.	
	Ola		
(e)		a is concerned about a denial of service attack (DoS) occurring on her webserver.	. • .
(0)	(i)	Explain what is meant by a denial of service attack.	
	(1)	Explain what is meant by a demai of service attack.	
			• • •
			•••
			4
	(ii)	Give one security device that can be used to help prevent a denial of service attack.	
		I	[1]

' (a)	An office has an automated lighting system. When movement is detected in the office the lights are switched on. If movement is not detected for a period of 2 minutes the lights are switched off. The system uses a sensor and a microprocessor.										
	Describe how the automated lighting system uses a sensor and a microprocessor.										
(b)	A microprocessor uses ROM.										
	Explain what is meant by ROM.										
	[3]										

8 Consider the logic statement:

X = 1 if ((A is 1 NOR C is 1) AND (B is NOT 1 NOR C is 1)) OR (A is 1 AND B is 1)

(a) Draw a logic circuit to match the given logic statement. Each logic gate used must have a maximum of **two** inputs. Do **not** attempt to simplify the logic statement.

(b) Complete the truth table for the given logic statement.

Α	В	С	Working space	X
0	0	0		
0	0	1		
0	1	0		
0	1	1		
1	0	0		
1	0	1		
1	1	0		
1	1	1		

[4]

9 The contents of three binary registers have been transmitted from one computer to another. **Even** parity has been used as an error detection method.

The outcome after transmission is:

Register A and Register C have been transmitted correctly.

Register B has been transmitted **incorrectly**.

Complete the **Parity bit** for each register to show the given outcome.

	Parity bit							
Register A		0	1	0	0	1	0	1
Register B		1	0	0	0	0	0	1
			I		I			
Register C		1	0	0	0	0	1	1
		1	ı		I	1	ı	[3]

10	Remy has a mobile device that has a capacitive touch screen.
	Describe how the capacitive touch screen registers Remy's touch.
